Press Release

Cam Sync Adapter for Porsche 911

Clewett Engineering now offers a Cam Sync Adapter for Porsche 911 engines. This adapter and sensor is used with sequential fuel injection. Sequential fuel injection deposits fuel once per cycle when the intake valve opens. The sensor provides a signal to the engine management system, indicating when the intake cycle will take place. It can be used with engine management systems that use Hall Effect sensors. Adapters are available for 2.0-3.3 liter and 964/993 engines. The Cam Sync Adapter includes fasteners and instructions for installation. Cam Sync Adapter and Sensor are sold separately. Our Cam Sync Adapter is a great solution for new installations or for converting existing systems using a distributor or other means.

1001-60	Cam Sync Adapter for 2.0-3.3 liter engines	\$118.00
1001-61	Cam Sync Adapter for 964/993 engines.....	\$118.00
7002-10	Cam Sync Sensor	\$ 72.00
